# Your next Billion Worth Project

## Initial X Offering

A complete set of verification processes based on X users to Anti Sybil Attacks. In the future, we will further introduce AI big data, etc. To further filter out effective value users.

## Targeting your first 10K high value users

We provide a set of simple and effective airdrop logic that the first 10K high-net-worth users can participate in, allowing your project to win at the starting line.

## ERC404 Pro Protocol

One contract includes three types of EIP features: ERC20, ERC721, and ERC1155. It also gives the project party a common benefit sharing mechanism for the early 10K users.
